Devendra Yadav

SENIOR FULL-STACK ENGINEER

Senior full-stack engineer with 9+ years shipping production systems in TypeScript across healthcare, fintech, cybersecurity, trading, and logistics — now building AI product infrastructure, including a multi-cloud healthcare copilot.

I build and own every layer — from Terraform IaC across AWS, Azure, and GCP to pixel-tuned UIs: Nuxt/Vue and React frontends, Node/NestJS services, and real-time data pipelines.

EXPERIENCE

Senior Full-stack Engineer

Jul 2024 — Now

Basis Worldwide · Ahmedabad

Leading Nuxt 4 development for CooperSurgical's fertility brand portfolio, architecting Terraform infrastructure across Azure and GCP, and building real-time CDC data pipelines. Clients include Fortune 500 companies.

Full-stack Engineer

Jan 2023 — Jun 2024

Benchmark Estimating · Remote

Full-stack development on a cloud-based cost and carbon estimating SaaS for infrastructure projects across Australia, UK, and New Zealand. Polyglot codebase: Node.js, C#, Python, React, MSSQL.

Team Lead

Oct 2021 — Dec 2022

Kavobits · Ahmedabad

Led engineering across medical, trading, and SaaS automation projects. Integrated ChartIQ for OptionsPlay, built Doxo's 130 req/s automation layer solo, and drove CI/CD adoption across the team.

Sr. Software Engineer

Jan 2019 — Sep 2021

ToxCore Solutions · Ahmedabad

Owned the entire Ragnar ecosystem — 10+ projects for America's largest relay race network. Led a 5-person team, introduced NestJS to replace legacy PHP, and built everything from Angular frontends to serverless microservices.

Jr. Software Engineer

Jan 2017 — Dec 2018

Logilite Technologies · Ahmedabad

First engineering role. Built a hybrid mobile Driver App (Ionic/Cordova) with real-time GPS tracking and a Node.js stream-processing dashboard visualising live delivery routes with D3.js.

SELECTED PROJECTS

CooperSurgical Fertility Brands

2024

Lead Nuxt 4 engineer for three CooperSurgical fertility brands — California Cryobank (sperm bank), Donor Egg Bank, and NW Cryobank — across 11 US donation locations. Built on AWS Elastic Beanstalk; sites score 90+ Lighthouse performance and load noticeably faster than the legacy builds.

Panopto Stream — CDC Pipeline

2024

Near-real-time CDC pipeline for Panopto's enterprise video platform (1,500+ universities). MSSQL → Debezium → Amazon MSK → AWS Lambda → Postgres mirrors dozens of tables with seconds-to-minute end-to-end lag.

MyOneLine Health — Cloud Infra

2024

Sole infrastructure owner for an AI physician copilot — 15+ Terraform modules provisioning AKS/GKE, managed databases, secrets, and networking/storage/CDN across Azure and GCP, with dev/staging/prod parity. Multi-cloud for client vendor-neutrality.

Ragnar — Full Platform Build

2021

Architected the complete platform for America's largest relay race network (750k+ runners) — 8 Angular sites, registration hub, CMS, ML face-recognition photos, and serverless microservices that absorbed tens of thousands of req/s at race-day peaks. Migrated hundreds of thousands of records off legacy PHP.

SIRP — Security Orchestration

2022

Architected the Playbook Editor for SIRP's AI-native SOC platform — a graph-based, no-code workflow builder at the core of the product (SIRP reports 80% lower MTTD and 70% faster MTTR).

Doxo — Billing Automation

2022

Solo-built a billing automation system sustaining 130 req/s — integrating Chargify, Salesforce, Chargeback, and Iterable to eliminate nearly all manual billing and chargeback ops across Doxo's 120,000+ biller network.

SKILLS

JavaScript & TypeScript
ES2024 · TS strict · Zod · type-level patterns · template literal types

Vue / Nuxt & React
Nuxt 4 · Vue 3 · Pinia · React · Next.js · Angular · Redux · RxJS

Cloud & Infrastructure
AWS · Azure · GCP · Terraform · Elastic Beanstalk · Docker · CI/CD

GraphQL & APIs
GraphQL · Apollo · REST · Swagger · federation · DataLoader · Socket.io

Node.js & Backend
Express · NestJS · Serverless · microservices · AWS Lambda · job queues

Databases
Postgres · MySQL · MSSQL · MongoDB · DynamoDB · Redis · Elastic Search

Data Pipelines
Debezium · Amazon MSK · Kafka · CDC · Lambda consumers · MSSQL → Postgres

Mobile
Ionic · Cordova · Flutter · Dart · hybrid apps

AWARDS & CERTIFICATIONS

2026	AWS Certified AI Practitioner — in progress	Amazon Web Services
2026	Generative AI with LLMs	DeepLearning.AI × AWS
2026	DeepLearning.AI — GenAI / LLM coursework	DeepLearning.AI
2025	AWS Certified Developer – Associate	Amazon Web Services
2021	Excellence Team Player	ToxCore Solutions
2021	3+ Years Long-Service Recognition	ToxCore Solutions
2015	2nd Place — State-level Code-o-Crack	R.B. Technical Institute
2015	1st Rank — College Semesters	Govt. MCA College, Ahmedabad
